# Los Altos Community Center

## LEED GOLD EQUIVALENT

The Los Altos Community Center is LEED (Leadership in Energy and Environmental Design) Gold equivalent. Elements include:

### THROUGHOUT BUILDING

- Abundance of windows, increasing daylight lighting and decreasing overall energy used for interior lighting
- All-electric building
- Water-wise devices
- Fans in every room limits need for air conditioning

### ROOFING

- 7,500 square feet of solar panels on the roof (attached to the LEED acceptable shingles) enables building to generate between 60% and 90% of its own electricity

### PUBLIC ART

In cooperation with the City of Los Altos Public Arts Commission, several avenues of public art are featured at the new Los Altos Community Center, including:

- Interior murals commissioned by the Public Arts Commission are based on Los Altos' Permanente Creek
- Public Arts Commission to manage a Community Art Gallery with rotating exhibitions
- Sculptures on the grounds are part of the Public Arts Commission loan program or is artwork donated to or owned by the City

### LANDSCAPING

- Landscaping drainage system filters and holds water run-off, simultaneously reducing strain on city water system and increasing water quality via four bioretention areas on-site
- Interior courtyard features a stone channel that runs alongside a central path and also provides site drainage for this 3-sided courtyard. Storm water exits the channel, and is routed to one of the Center's four bioretention areas where it is filtered and held for future use.
- Four green vehicle charging stations
- Multiple bicycle rack areas
